The KNAPP group

Intelligent logistics solutions for data-driven value chains.

E-Commerce, omni-channel experience or customizing: Consumers are dictating the trends and driving logistics requirements. The technological opportunities in our data-driven world make this possible. Urbanization, lack of space or personnel or 100 percent traceability are additional challenges.

Intelligent logistics creates added value

Networked, intelligent value chains in which all the logistical cogs engage perfectly with each other provide the answer to the challenges of today. It may sound simple but this requires utmost precision. Our solution: Intelligent end-to-end logistics including software.

Get the most from your value chain

From production to distribution to the last mile or point of sale: We offer intelligent and profitable automation solutions for the entire value chain. In this way, you can develop logistics processes with intelligent technologies sustainably, simply and economically.

Tailor-made Partnership.

Good partners are good listeners and cater to individual goals and requirements. That's why we don't deliver off the rack systems. We take the time necessary to understand **what you really need** and work closely with you to develop a tailor-made solution for you considering:

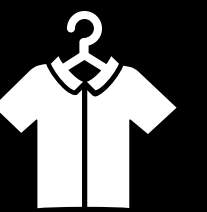

- .Your logistics requirements
- .Your growth targets
- .Your investment framework

Our goal is to translate the individual character of your business and your company into efficient logistics processes. In doing so, we rely on the following principles: **Listen, ask questions, understand and implement.**

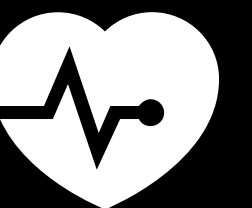

Good solutions adapt with changing requirements. Our solutions are easily scaled in terms of performance as well as size. That's how we can ensure that you can make the best use of your system at all times and have sufficient capacities for seasonal peaks as well as growth.

Warm-up. Run. Boost.

Full efficiency and optimal operation for the lifetime of your system. This is the mission of our Customer Service division. A comprehensive portfolio of services is available for every phase of your project.

Industry

Who could tell success stories better than our customers?

Progressive thinkers. Shaping the future. Since 1952.

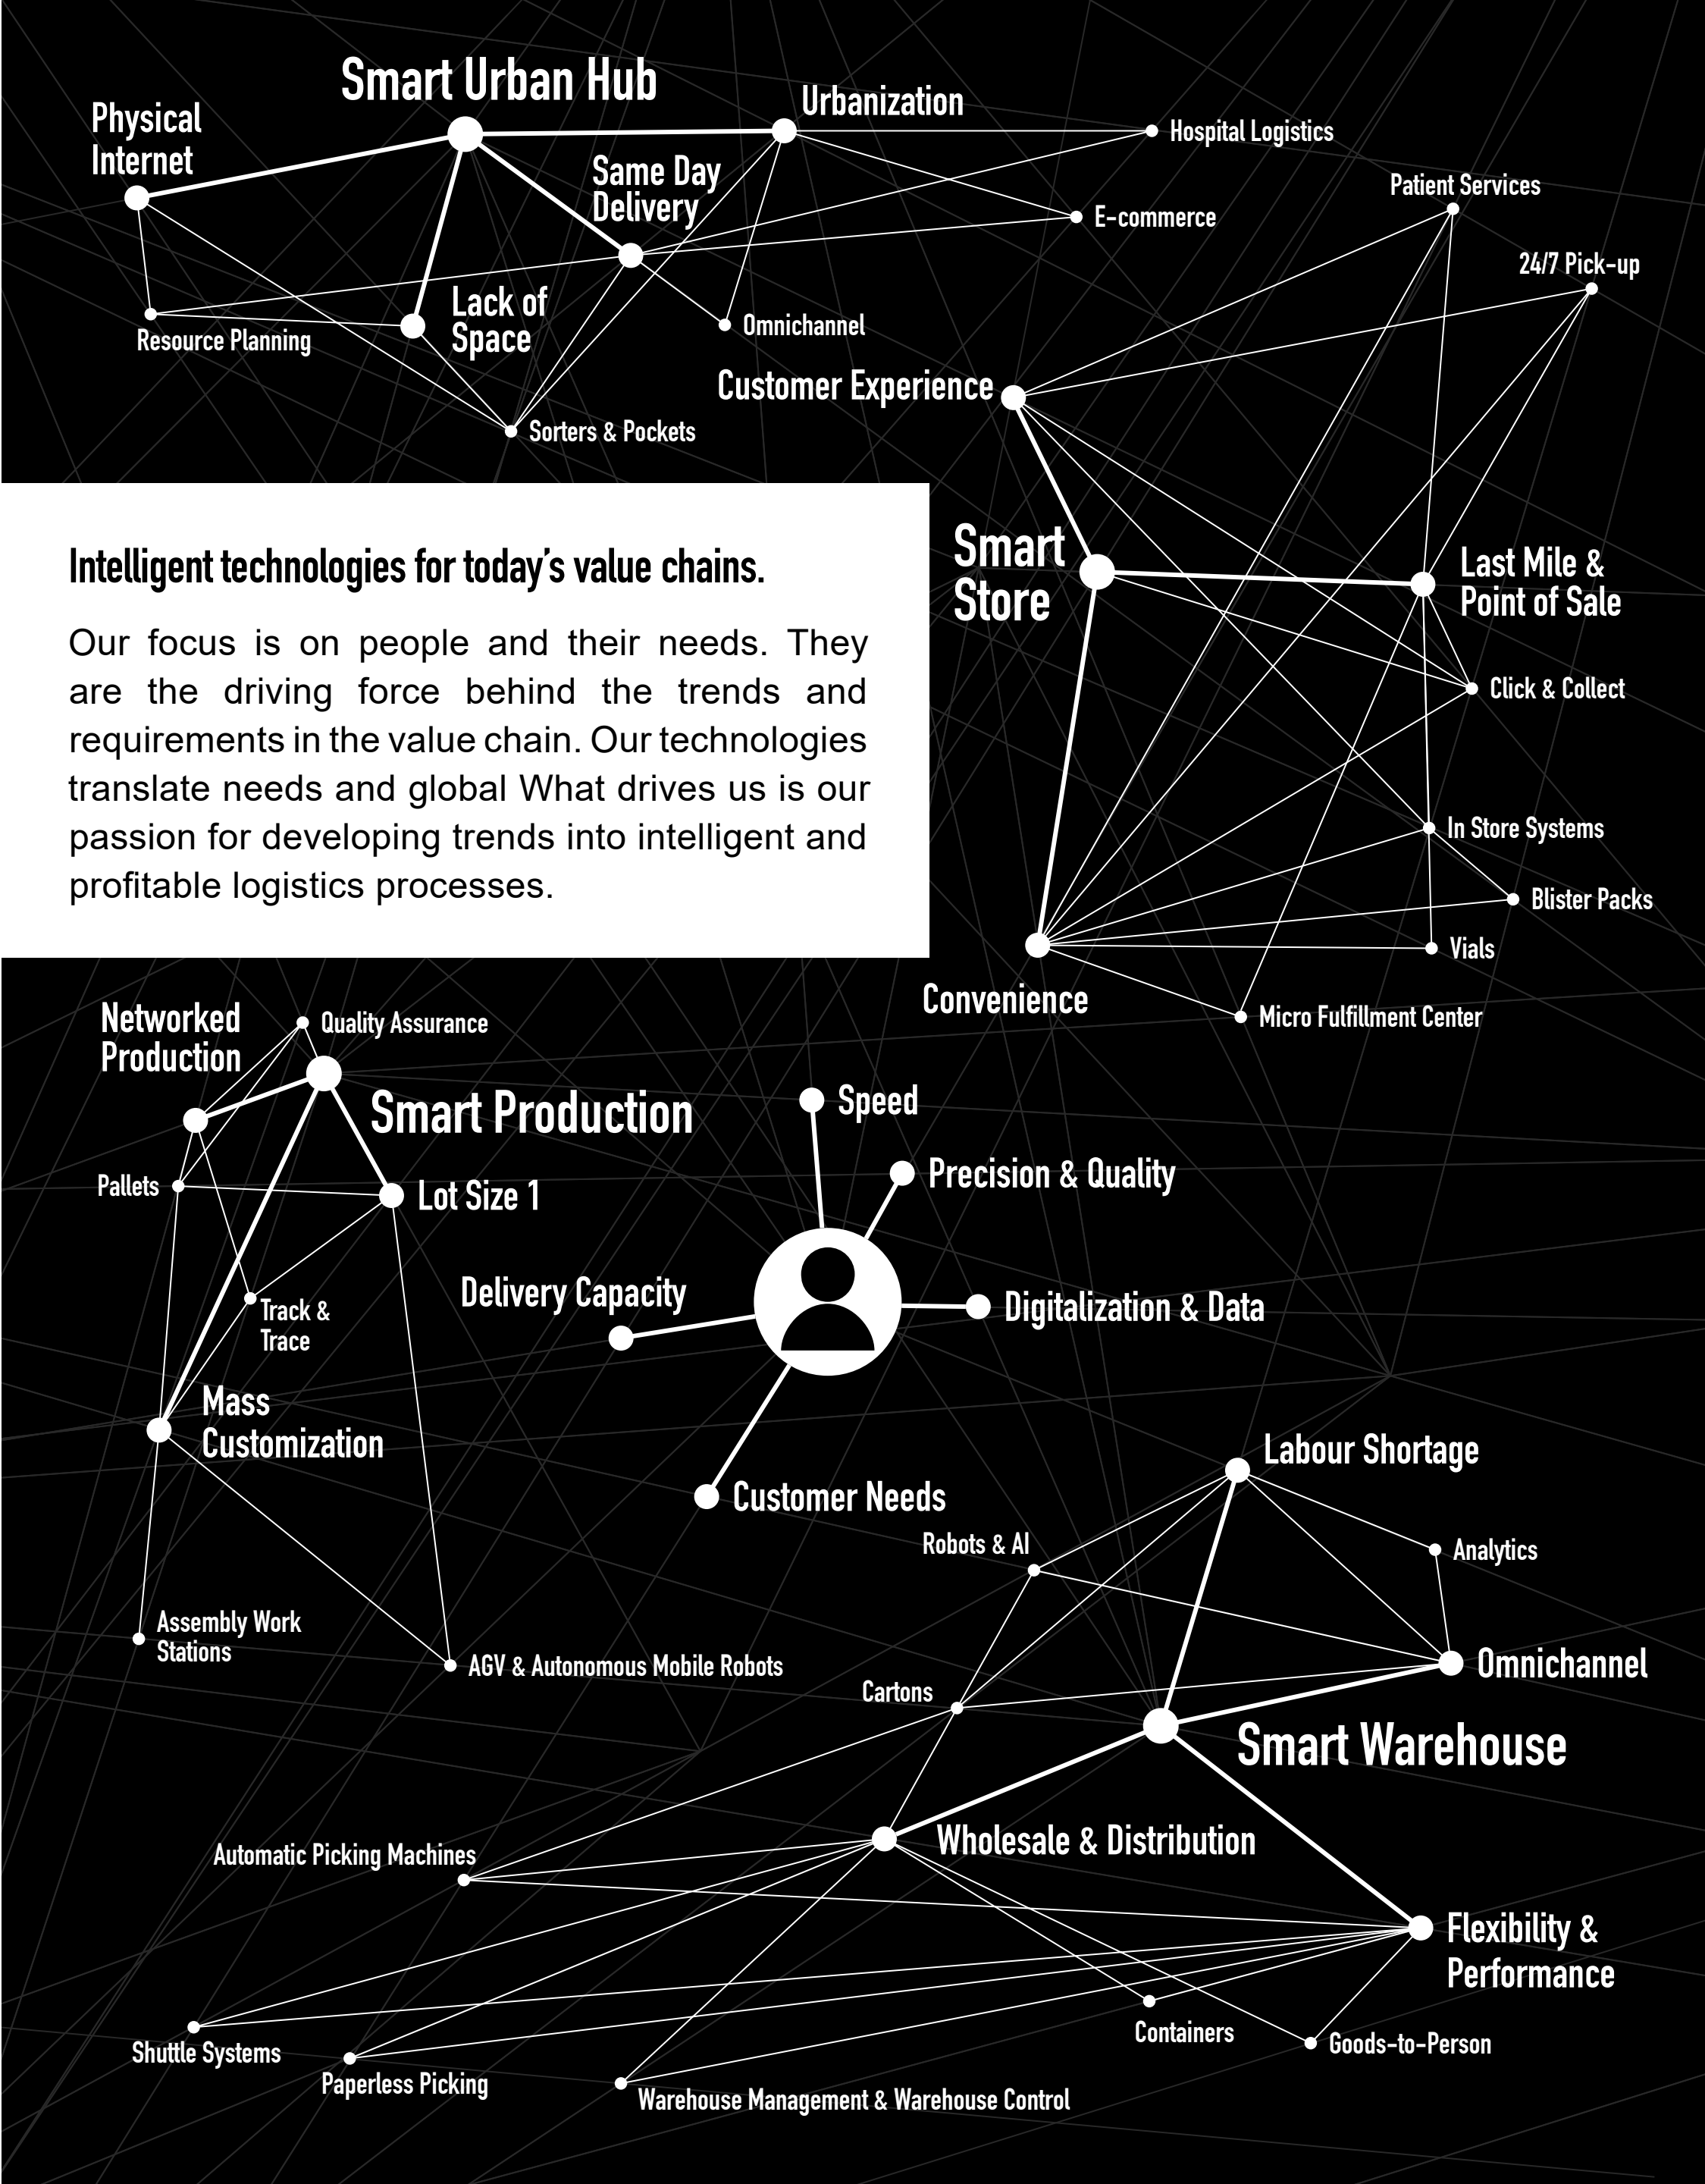

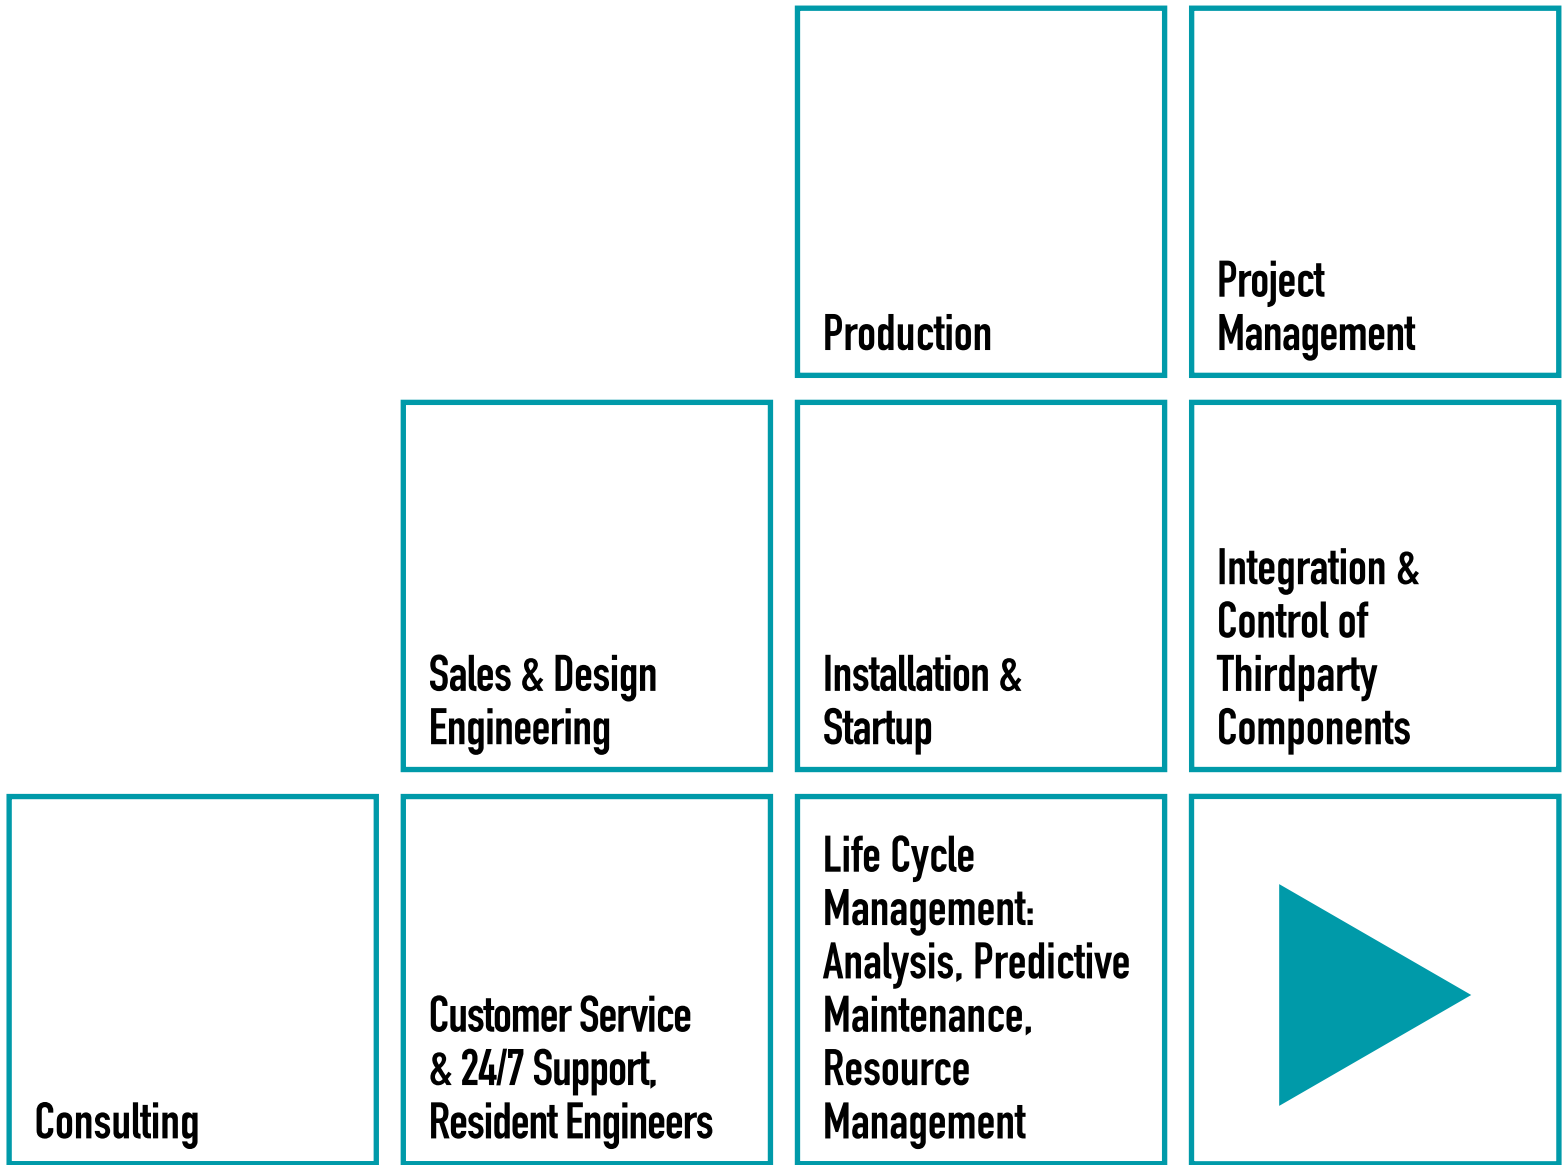

What drives us is our passion for developing new solutions for the ever-evolving demands in production and logistics. We don't say: "We've always done it this way." We say: "New challenges – bring them on!"

Innovation is in our DNA

- 1960s: Company founder **Günter Knapp** invented the first autopicker for pharmaceutical wholesalers.
- Since the **1980s**, we've been delivering all-in-one solutions including software.
- 2002**: We are pioneers in shuttle technology thanks to our **OSR Shuttle™**.
- Today**: Software forms the foundation for intelligent logistics processes. Our intelligent portfolio includes cloud-based software, robots with AI, analysis tools or predictive maintenance.

Your complete one-stop solution.

Tailored to your logistics requirements and goals: **Complete solutions, including software, from a single source.** From XS to XXL or from a semi-automatic starter solution to a high-performance fulfillment center.

In a world where everything
is constantly changing,
strong values
and trust matter.
Partnership matters.
